

# Always the desire to innovate in plastics?

Van Meeuwen Chemicals provides solutions that improve the performance of your plastic sheet and rigid plastic packaging.

Optimize your product in easy release, static resistance and prevent condensation.

- **De-blocking agents:**  
Improve the mold release and denesting of all cups and packagings.
- **The anti-static agents:**  
Resist the static loading during the extrusion process and the final product.
- **Anti-fogging agents:**  
Prevent condensation and bring you clear visibility.

Additives to optimize your production process and product.

## How does it work?

Specialty fluids are proven to be the best solution in cost - performance. Master batches are economical and effective in low concentrations.

We offer several types of anti-static, de-blocking and anti-fogging agents:

- Silicone compounds and emulsions
- Organo-modified silicones
- Compounds and concentrates
- Master batches

Van Meeuwen Chemicals is ISO certified and supplies products to the FDA and EU regulations and is therefore suitable for food applications.
